About Us →

Technical

/Development

/Linux

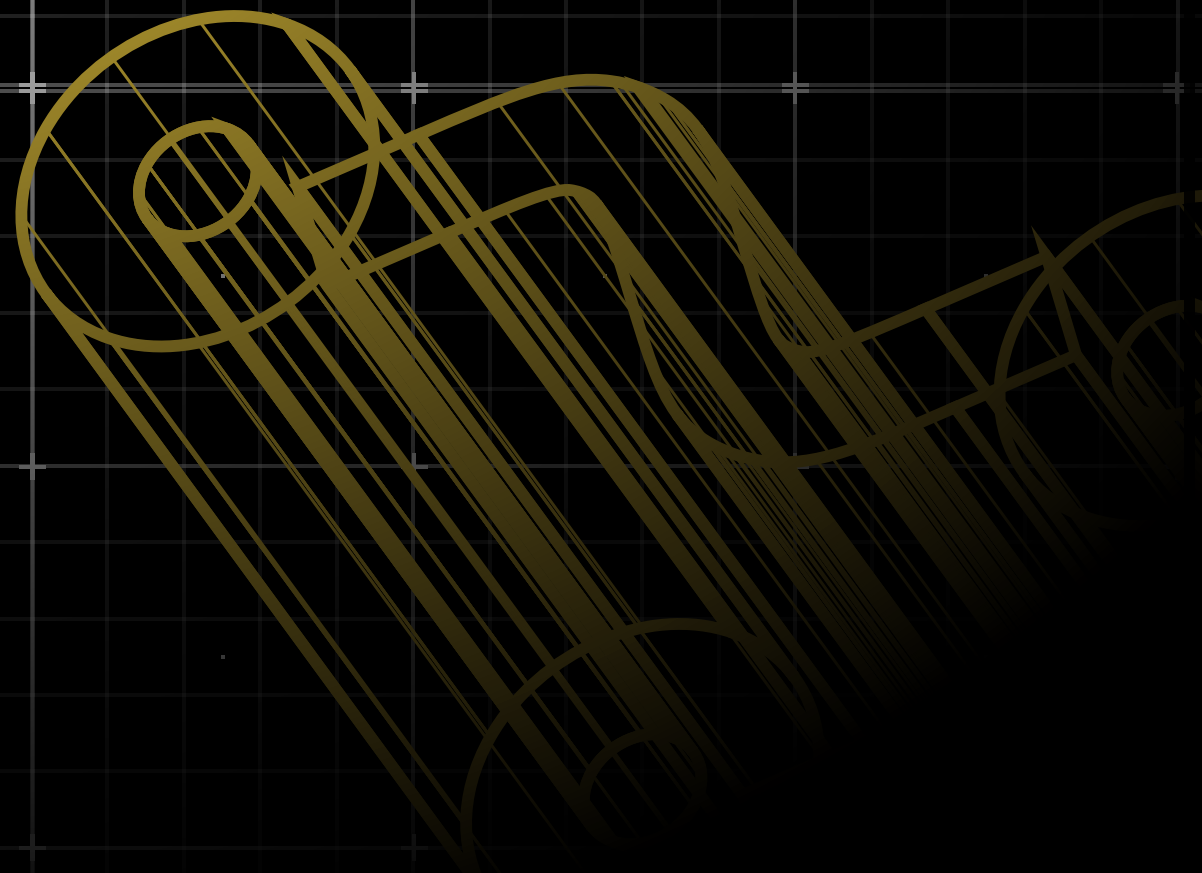

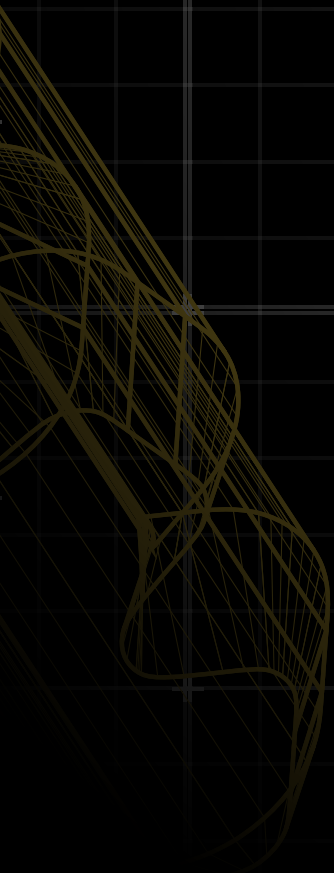

/Cyber_Security

The Technical Department is the backbone of our club, focusing on a wide range of technical activities and projects. Members will engage in software development, Linux system administration, and cybersecurity initiatives. This department provides an excellent opportunity to work on cutting-edge technologies, participate in coding challenges, and contribute to open-source projects

Management

The Management Department oversees the administrative and organizational aspects of the Linux Club. This department handles event planning, coordination, and overall club operations. Members will develop project management, leadership, and organizational skills, ensuring smooth execution of club activities and events.

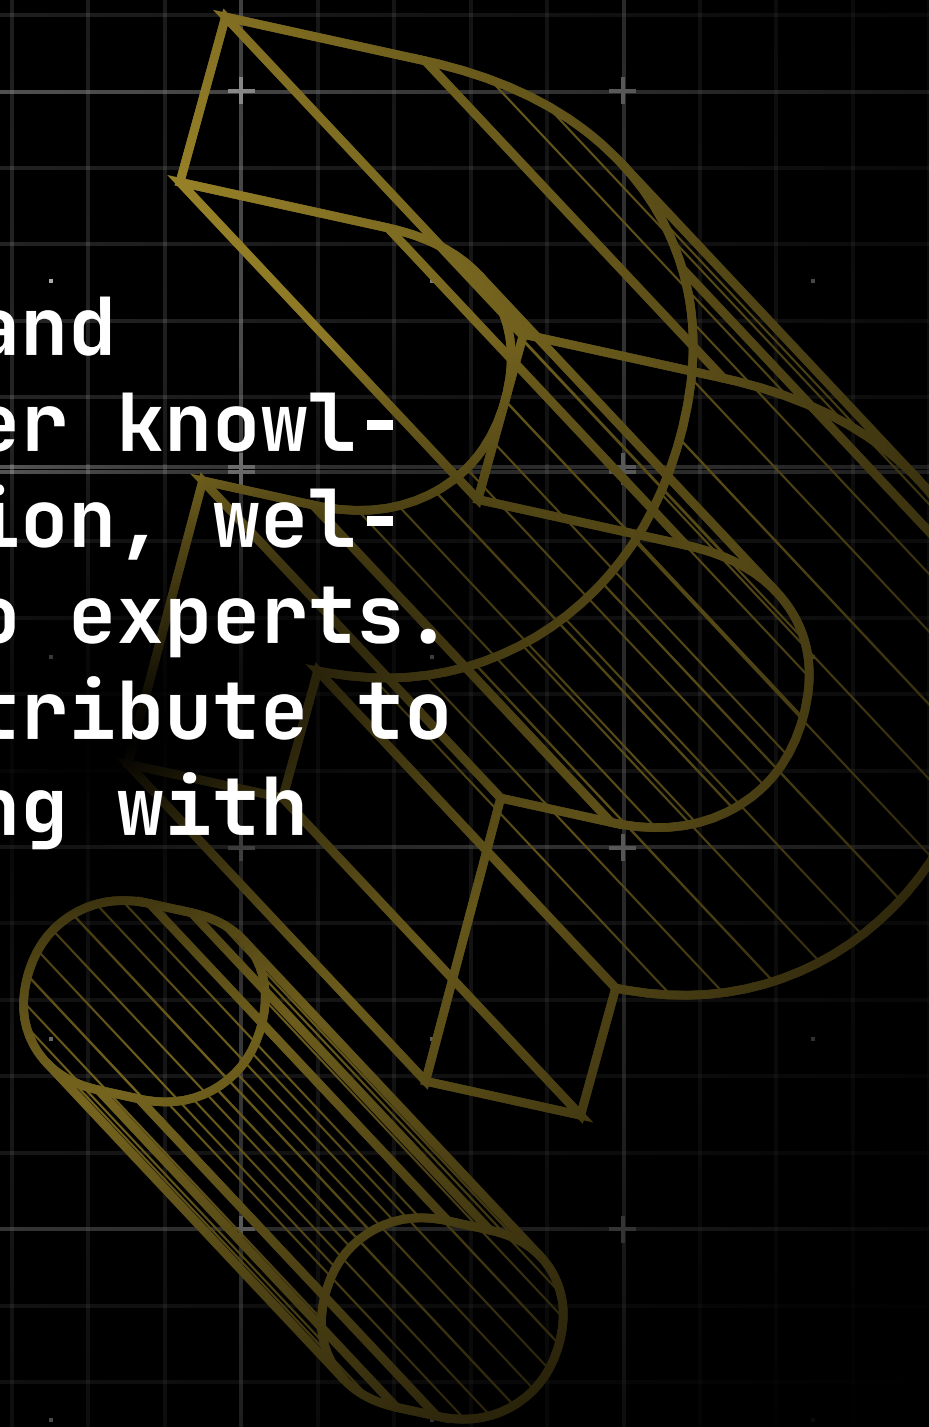

Media

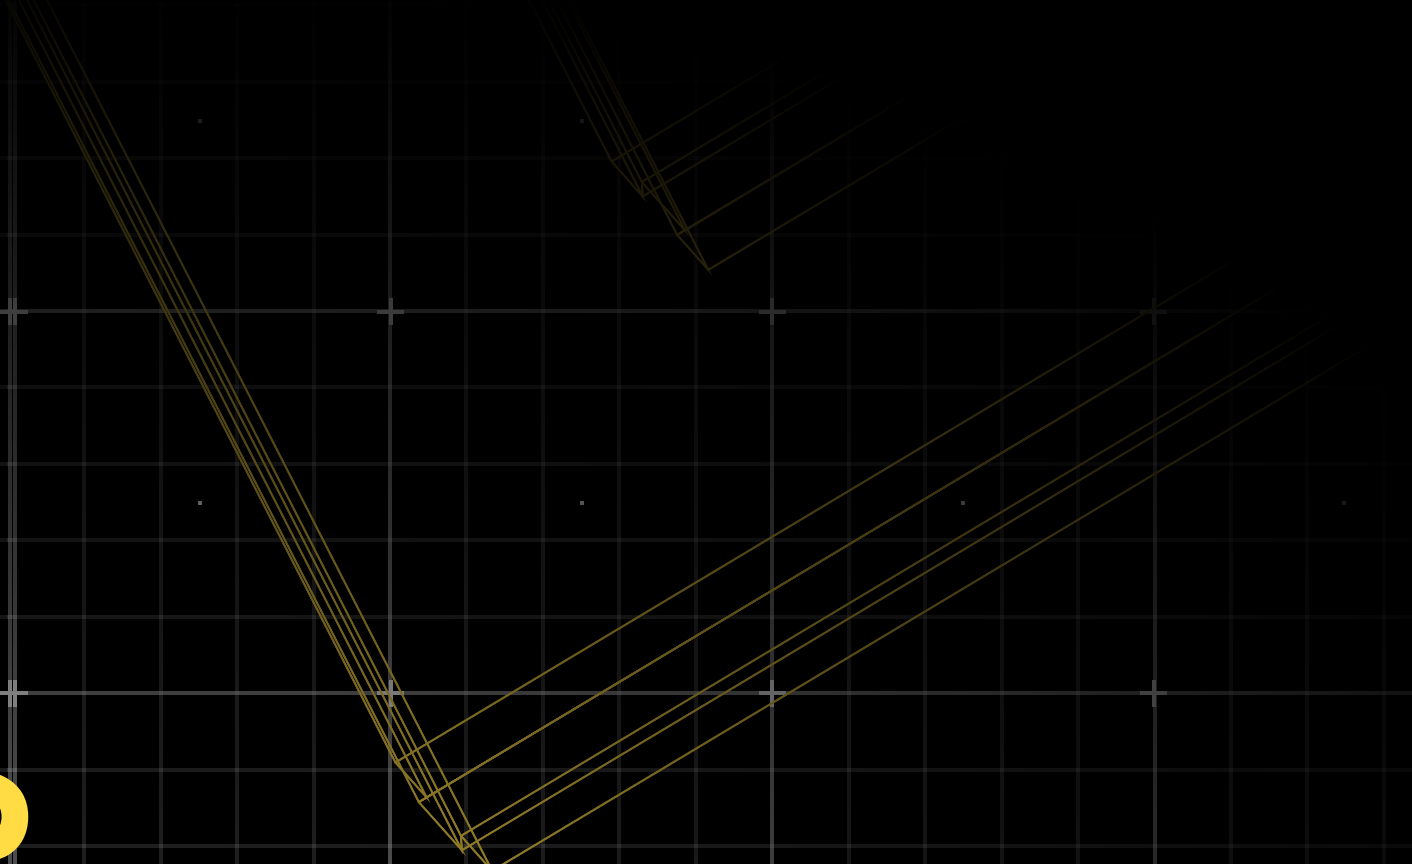

/Event_Photography
/Social_Media_Management
/Design_and_Editing

The Media Department is responsible for capturing and sharing the vibrant activities of the Linux Club. This department manages event photography, social media, and design tasks. Members will develop skills in photography, video editing, graphic design, and social media management, ensuring the club's events and initiatives are well-documented and promoted.

What is LUG?

A passionate community of Linux and open-source enthusiasts. We foster knowledge, collaboration, and innovation, welcoming everyone from beginners to experts. Join us to learn, share, and contribute to exciting projects while connecting with like-minded individuals.

Abstract geometric lines in the top right corner, consisting of several thin, parallel lines that converge towards a point, creating a sense of depth and movement.

Why LUG?

Be a part of The Elite

We bring together the best minds to achieve the best they can.

Be the one who push the limits of their field.

Every one of the members become the best of the best.

Why LUG?

Learn from *The Best*

Want to pick up a skill and work on it?
Someone in the club will probably already
know it.

Reach out and ask for their guidance. With a
helpful and tight-knit community, you most
certainly will get the help you seek.

With regular internal workshops and resources shared, there is plenty to learn and many fields to explore. Got a skill you want to showcase and teach, take the stage and share!

Marketing & Sponsorship (M&S)

The Management Department oversees the administrative and organizational aspects of the Linux Club. This department handles event planning, coordination, and overall club operations. Members will develop project management, leadership, and organizational skills, ensuring smooth execution of club activities and events.

Why LUG?

Find *your* team

Have a senior who you really want to work with or some members you want to participate in events with? Make your team and pick a guide from your seniors to help you at events.

Form your own hackathon and CTF teams from within the club, collaborate and compete in external competitions.

Get to collaborate and learn with seniors while attending events! We mix and match teams so you can find your perfect teammates.

Abstract geometric lines in the bottom right corner, consisting of several thin, overlapping lines that form a series of nested, elongated shapes, possibly representing a stylized building or a network structure.

And so many more reasons!

Learn from first principles: We're not afraid to challenge the underlying or question abstraction. We built our own CTF platform, host our own hub, git, meet platform, cloud collaboration platform and forum. We conduct dynamic CTF challenges.

Follow best practices: In progress, refer to Uncle Sam's philosophy, 12-factor app, pair programming. So we learn from hacky fixes: Last-minute corrections teach what NOT to do, and you have to ask. If this suits your vibe

**And if not all this,
then...**

*Why not just shoot your shot? You
miss 100% of the shots you don't
take.*
